## **LIBRARY WINES**

---

Jamsheed Wines was established in 2002 by Gary Mills. Traditionally we were located in the Yarra Valley but found our forever home when we relocated to Preston in 2018. All our wine is now made in this very building!

Over the 21 years that Jamsheed has been producing wines, we have had the absolute pleasure of working alongside some of the best growers in Victoria, some of whom we have been lucky enough to grow and prosper long relationships with, while with others we are grateful to have had but fleeting moments.

Our fascination with exploring the difference in sites tended by these growers, each resulting in their own unique flavour profiles, is how and why Jamsheed was created.

We are proud to be able to offer you a range of these Single Vineyard, or single site, wines which have been lovingly selected and stored for this very reason – for you to be able to travel back in recent times to see what these soils had to say.

### WARNER VINEYARD / BEECHWORTH

---

The Warner vineyard lies approximately 10 minutes south on the highway leading into the Beechworth township. Originally planted as a partnership between the Warner family and Giaconda Winery, the site is revered for its deep granitic profile and endless blue skies. The vineyard consists of 2 blocks planted to Syrah, Roussanne, Marsanne and Chardonnay.

We have been working with the Warner vineyard since 2011 and are very happy to have some lovely examples of previous vintages to share.

### GARDEN GULLY / GREAT WESTERN

---

The Garden Gully Vineyard was planted circa 1890 making it one of the oldest Victorian, if not Australian, vineyards. The Great Western is celebrated for its famed soil profile of 'Concongella' which is desiccated clay over deep ironstone bedrock bringing ferrous flavours to the fore. Yields are always miniscule but the resulting intensity of flavours adequately compensates for this.

### SEVILLE / YARRA VALLEY

---

Located on the Yarra River in Seville and showcasing a mix red clay 'Monbulk' soils and more traditional Yarra grey river soils, this vineyard traditionally gave us Syrahs with understated longevity and power. Game meats, salumi and red cherry were always part of the tapestry of these Syrahs.

#### HEALESVILLE / WOORI YALLOCK

---

The Healesville vineyard lies on the border between Healesville and Woori Yallock in the Yarra Valley. Exposure to strong winds on the North and South, combined with the depleted rocky soils, produces wines of fine boned medium weight with bright acid and drive.

### YARRA / SILVAN

---

Known as the Denton Vineyard, this is one of the only granitic outcrops in the Yarra Valley. Granite and Syrah have a wonderful symbiotic relationship – producing smoky, gunflint perfume and electric lines of texture.

The Upper Yarra in the cooler southern vales of the Yarra Valley is home to some extraordinary deep red clay 'Monbulk' soils that produce wines of lush velvet texture and sweetly perfumed black cherry fruits. The longer ripening season results in plump fruit flavours with lower alcohol.

### GRUYERE / WARRAMATE

---

Once known as the Warramate Vineyard in the 'golden circle' of original Yarra Valley plantings, the Gruyere vineyard allowed us to make a couple of exceptional Syrahs early on in our exploration of the Yarra. The vines were already 40 years old when we worked with them, showing all the hallmarks of the subregions meaty, gamey, fleshy black bramble fruits.

### PYREN / PYRENEES

---

Situated on the cooler southern side of the Pyrenees highway in Warrenmang, the Pyren vineyard showcases quartz laced pink granite shallow soils. Dry farmed with small yields results in exceptionally intense and ageable Syrahs.

### MOONAMBEL, PYRENEES

---

Sourced from the old Taltarni vineyard planted in 1969. Dry farmed on quartz laced granite, these vines are low yielding but produce intense flavours with long lived tannins.
